BPS® C2

Outstanding performance meets compact size

Outstanding performance with compact dimensions: the latest generation of tabletop systems from G+D enables banknotes to be processed even more efficiently and cost-effectively.
A throughput rate of 1,050 banknotes per minute ensures outstanding productivity – even when reading serial numbers. Two output compartments offer an array of options for sorting, such as by denomination, orientation, or fitness.
What's more, the best sensors in their class guarantee maximum reliability for authentication and fitness detection. This makes BPS C2 the go-to choice for top performance and a high degree of variability for commercial banks, retailers, cash-in-transit companies and casinos.

Extraordinary efficiency for future-proof operations

GREATER PRODUCTIVITY
The high throughput of BPS C2 considerably increases productivity. With no loss of speed, banknotes are counted, checked for authenticity, and sorted by denomination, orientation, and quality. User-oriented and optimized operator guidance keep the number of work steps required to a minimum.

GREATER SECURITY
BPS C2 boasts the ultimate top-class sensor – fast, reliable, precise.
The system's remarkable capability to detect counterfeits and sort for fitness reliably and consistently throughout the service life of the system is setting new standards.

GREATER EASE OF USE
Intelligent software architecture ensures a simple and intuitive operation and also enables the user to make precise alterations to suit specific customer requirements, so offering maximum flexibility. Intuitive operation has been redefined – streamlined, unique, and scaled down to what's important.

GREATER FUTURE VIABILITY
Numerous interfaces make it easy to integrate BPS C2 into your processing environment and to fully leverage the versatile nature of networked industry. Modern tools, apps, and web services can be seamlessly included for customer processes that are efficient and cost-saving.

1,050

BANKNOTES PER MINUTE
BPS C2 combines speed with precision. It always achieves a consistent speed, during counting, sorting, authentication and even when reading serial numbers.

Our experts will help tailor-make the perfect solution for you

G+D experts use their expertise and experience to help you to find precisely the right solution for your individual requirements – and to seamlessly integrate them into your system landscape.

Let's talk!

TECH FACTS

Speed
1,050 BN/min

BN formats (Length × Width)
100 – 181 × 60 – 95 mm

Currencies
up to 10 currencies

Singler capacity
(depending on BN quality)
up to 900 BN

Output compartment capacity
(depending on BN quality)
up to 250 BN

Reject compartment capacity
(depending on BN quality)
up to 100 BN

Dimensions (H/W/D)
51 × 33 × 39 cm

Weight
~ 26 kg

Temperature range
15 – 35°C

Electrical specifications
100 – 240 VA, 50/60 Hz

External connections
1 × LAN, 4 × USB host, 1 × USB device

Certificates
CE, GS, CB
